Since, it is being added in the moderator system, its quality should be very stringent. At present Sigma Aldrich make anhydrous di boron trioxide is the only available known to be added in moderator system of different nuclear power plants in India. This chemical is used in high neutron field and kept for longer time in moderator system and is proven to withstand high radiation field. In case of radiolysis of moderator system heavy water by this chemical there can be excursion of deuterium in moderator cover gas which can jeopardize the safety of the system. Hence Sigma Aldrich make Anhydrous Di-boron trioxide is specified in the indent. Competent authority is requested to approve the purchase of anhydrous Di-boron trioxide, make-Sigma-Aldrich on proprietary basis as other make cannot be used in existing system.	Station Chemist	-
