26	IMPELLER KSB	NAPS/CMM/1/24665	01-01-1970	KSB LIMITED	33124	16-03-2022	3184230	10-09-2022	24665 Indented Impeller is the spare for NALP pump Make M/s KSB. Hence spare parts of NALP Pump are the proprietary item of M/s KSB. C.A may kindly approve the purchase of NALP Pump spares from OEM under proprietary head.	SME(M)	-	NAPS
27	FLOWSERVE SEAL	NAPS/CMM/2/25448	01-01-1970	FLOWSERVE SANMAR PVT LTD.	33091	09-03-2022	1642860	04-09-2022	Indented item i.e. M/s Flowserve make Mechanical seal is installed in Fueling Machine Head assembly (Ram-B drive and latch drive mechanism). Fueling Machine head became the part of PHT system (reactor core) during on-power refueling operation. Failure of Mechanical seals during on-power refueling operation has direct impact on nuclear safety and may cause the following:- a) Spillage of PHT D2O, Unit outage and Loss of cooling of core bundles. b) Loss of cooling of spent fuel bundles inside Fueling Machine head. Retrieval operation for this failure of FM during refueling is a penalty to both manpower and dose incurrence. Retrieval operation can be done only in unit outage which is again a high economic penalty. Indented item i.e. M/s Flowserve make Mechanical seal is of proprietary nature item and same is required for one to one replacement in the existing system. No other make Mechanical seal can be replaced one to one in existing system. In view of above, Competent authority is requested for kind approval for procurement of indented item as proprietary.	SME(F)	-	NAPS

Hence it is proposed to procure Swagelok make fittings on proprietary public tender basis. Competent authority may kindly approve the same.	SME(I)	-	NAPS

									Indented items are O-ring for PSS DM, RCM DM and Motor unit gear box assemblies. All system is Class-I safety related systems. To ensure the intended function from safety related system equipment's, it is essential to install best quality spares in these equipment's. Indented O-rings are installed in the equipment's to seal the heavy water, silicon oil etc. Any leakage due to failure of the O-ring will lead to leakage of heavy water/ tripping of the unit and levy high economic penalty on the corporation, hence best quality O-rings are required for these system equipment's. In past M/s Parker and M/s Vako make O-rings were procured against indents with number of specific brands, and installed in the system equipment's (Ref CMM/NAPS/II/ 23425 /PO-31169, Date: 18/11/2019). Performance of M/s Parker and M/s Vako make O-rings is found satisfactory. No failure due to failure of O-rings is reported in the system equipment's till now. As processing of indents having multiple brands is not feasible in the procurement process through GeM, hence we have to go far single brand for O-ring procurement. Cost of the M/s Parker make O-ring is approximately 2 to 3 times higher than price of M/s Vako make O-rings and performance is at par with M/s Parker make O-rings. Hence M/s Vako make O-rings are being proposed to procure through this indent for PSS and RCM system equipment's. Considering above facts and past performance, CA may kindly approve the procurement of the O-rings for PSS DM, RCM DM and Motor unit gear box assemblies on spare parts of the existing item basis.
